

**RAPA**

# INNOVATE WITH US!

From Engineering to Series Production

## CUSTOM HYDROGEN VALVES & SYSTEMS

Custom Product Development and Manufacturing

Tailored to Perfection for Hydrogen Applications

Including Electronics and Software

Competitive Pricing

The Best Address for Smart Valve Technology

## RAPA – Your Valve Specialist & Engineering Partner for Innovative Solutions in the Hydrogen Sector

As a system integrator, we provide tailored expertise in development and manufacturing, offering specific solutions from product development to series production. Working closely with you, our R&D department develops innovative, functional, and cost-effective valve solutions, ranging from individual components to assemblies and intelligent integrated systems.

**Your advantage?** Save time, money, and valuable resources with our support. Outsource development projects and focus on your core competencies. Rely on the specialized expertise of our RAPA engineers in the field of valve technology for fuel cells, hydrogen combustion engines, and hydrogen storage systems. Minimize time and cost investment, reduce risks, and ensure a smooth production process.

**Stay one step ahead in a thriving market – with RAPA by your side!**

### Our Development Expertise and R&D Disciplines

- > Design, Concept Development, and Problem-Solving
- > Technology Consulting, Feasibility Studies, and Innovation Advisory
- > Product Development and System Engineering
- > Mechanical Design
- > Electronics Development and Software
- > Prototyping, Simulation & Testing, Validation
- > In-house Accredited Central Laboratory for Quality Assurance
- > Process Development
- > Volume Production
- > Sophisticated Supply Chain Management
